Welcome to Smart Citizens

Empowering Your World, Smartly.

Welcome to Smart Citizens, where innovation meets convenience, creating smarter living and working environments tailored just for you. As pioneers in the smart home automation industry, we leverage cutting-edge AI and IoT technologies to revolutionize how homes and businesses operate, making everyday tasks simpler and more efficient.

At Smart Citizens, our mission is to integrate intelligent technology seamlessly into your daily life, enhancing your comfort and security while promoting sustainability. Through our wide array of products—from smart door locks and lighting solutions to advanced security systems and energy-efficient controls—we provide you with the tools to transform your space into a highly functional and sustainable environment.

Dive deep into our comprehensive catalog to explore state-of-the-art solutions that not only promise to enhance your daily life but also aim to cultivate a connected and environmentally conscious community. Each product and solution is designed with you in mind, ensuring ease of use, reliability, and the highest standards of quality.
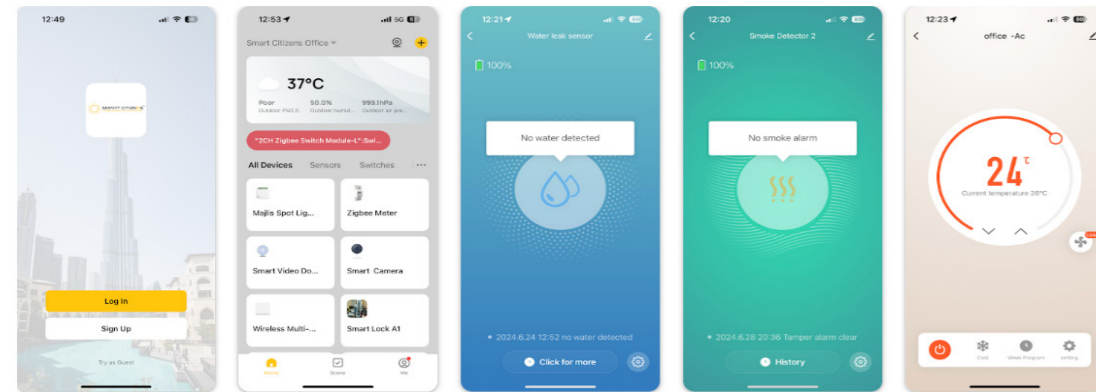

Let's make your world smarter, together.

THE COMPANY

Innovate, Integrate, Inspire: Smart Living Redefined.

Smart Citizens is an innovative technology company dedicated to transforming everyday living through smart, interconnected solutions. Founded in 2020, Smart Citizens specializes in AI and IoT-powered systems that enhance efficiency, convenience, and sustainability in homes, offices, and cities. The company focuses on smart home automation, smart energy management, IoT solutions, and cutting-edge wearables, empowering individuals and organizations to embrace the future of smart living.

With its smart app available on Google Play and the Apple Store, and one of the region's leading online smart home business platforms, Smart Citizens ensures efficiency and seamless integration in every aspect of modern living.

Our Mission:

To harness the power of AI and IoT to design and deploy innovative technology solutions that optimize resource usage, improve efficiency, and promote environmental sustainability.

Our Vision:

Creating a connected world through innovative AI and IoT solutions, Smart Citizens envisions empowering communities with sustainable, efficient, and intelligent technologies that enhance quality of life and foster global progress.

Advanced Technology Integration:

Smart Citizens leverages cutting-edge artificial intelligence and the Internet of Things to bring about a revolution in home and business automation.

Our technologies automate daily tasks, enhance security, and optimize energy use, creating intelligent environments that are not only efficient but also adaptable to individual needs and preferences.

Comprehensive Product Range:

We offer a diverse array of smart products that cater to every aspect of modern living and business operations. From smart door locks and sophisticated security cameras to intuitive lighting systems and energy-efficient HVAC solutions, Smart Citizens ensures that every component of your environment can be controlled with ease and precision.

Customized Solutions:

Understanding that each home and business has unique needs, Smart Citizens excels in providing customized automation solutions. We work closely with clients to assess their spaces and design systems that maximize functionality and convenience.

Our approach ensures that every installation is tailored to optimize the specific layout and usage requirements of the client.

Sustainability Commitment:

At Smart Citizens, sustainability is a core principle. Our products and systems are designed to reduce carbon footprints by minimizing energy consumption and utilizing eco-friendly technologies. We aim to help our clients achieve their sustainability goals, making smart homes and businesses not only smarter but also greener.

Our Smart Products

- Smart Citizens offers a comprehensive suite of smart home automation products designed to enhance the convenience, security, and efficiency of both residential and commercial spaces. Our Smart Products revolutionize home automation by offering a wide range of cutting-edge solutions designed to enhance comfort, convenience, and efficiency. From smart lighting and HVAC control to advanced security systems, our products integrate seamlessly into everyday life, allowing users to manage their homes with ease via smartphone apps, voice assistants, or automated scheduling. Our smart solutions provide energy-saving benefits, increased security, and improved lifestyle flexibility, ensuring that your home adapts to your needs. Whether it's controlling lighting, curtains, or appliances, our products deliver a modern, interconnected living experience.
- The Smart Citizens app empowers users to effortlessly control and monitor their smart home systems from anywhere, offering seamless automation, energy efficiency, and enhanced security at their fingertips.

Seamless Control: Master Your Environment at a Touch

Experience unprecedented control over your home or business environment with our range of smart products. From adjusting the thermostat to locking your doors, our intuitive systems are designed for effortless management. Whether you're at home or away, our solutions ensure you're always in charge, providing a seamless interface for all your automation needs.

Intelligent Automation: Smart Technology, Smarter Living

Embrace the future of living with intelligent automation that learns and adapts to your lifestyle. Our smart sensors, lighting, and HVAC solutions are engineered to optimize your comfort and efficiency. They react in real-time to changes in your environment, saving energy and enhancing security without any manual intervention. Transform your space into a dynamic, responsive habitat that supports your everyday activities with precision and ease.

Smart Door Locks

Applications and Use Cases:

Residential Security: Ideal for homeowners looking for a reliable and secure way to manage access to their homes.

Office Spaces: Enhances security and convenience in office environments allowing for controlled access via multiple methods.
Rental Properties: Perfect for landlords who need to manage access for different tenants efficiently; easy to reset and reconfigure for new users.

Upgrading Old Locks: Provides a modern, secure solution for upgrading from traditional mechanical locks without additional modifications.

Emergency Access: Offers a mechanical key option for emergency situations, ensuring access is always possible.

High-Traffic Areas: Suitable for doors that require frequent access, providing durable and quick entry options.

Design-Conscious Settings: With its sleek design and finish options, it complements interior aesthetics while providing essential security features.

Smart Fingerprint
Model: G109 Series

Aluminum alloy, framed or frameless glass door, fingerprint, password, card unlock, remote control optional, frameless glass thickness 10-12mm, door gap 1.5 cm, frame thickness at least 3 cm, frame width 7.5 cm.

SDL07

### Smart Fingerprint
Model: A290 Series

Aluminum alloy material, black nickel, 12 digits passcode, app, password, fingerprint, key card, manual key, micro-USB power charger, auto-lock and unlock.

SDL08

Smart Fingerprint
Model: A230 Series

Aluminum alloy, 12 digits passcode, app, password, fingerprint, card, mechanical key, auto lock and auto unlock.

Smart Sensors

Smart Sensors

Smart Citizens' range of smart sensors provides comprehensive solutions for security, convenience, and efficiency in smart homes and commercial environments. From monitoring entry points with door sensors to ensuring safety with smoke detectors and leak sensors, these devices empower homeowners to live smarter, safer, and more comfortably. Each sensor is designed to integrate seamlessly with mobile apps and home automation systems, ensuring that your home is always connected and protected.

SSE01

Window/Door Sensors

These sensors detect when windows or doors are opened or closed, enhancing home security by sending instant alerts to your smartphone.

SSE02

Motion Sensors

Smart motion sensors detect movement within a specified area, making them ideal for security systems and energy-saving automation.

SSE03

Temperature and Humidity Sensors

These sensors monitor the temperature and humidity levels in your home, providing real-time data to your smart thermostat for optimal climate control.

SSE04

Vibration & Glass Break Sensors

Vibration sensors detect unusual vibrations and breaking glass, making them essential for securing valuables and enhancing structural monitoring in various environments.

SSE05

Smoke and CO Sensor

These sensors detect smoke and carbon monoxide, providing crucial early warnings to prevent fires and CO poisoning.

SSE06

Air Quality Sensors

Smart light sensors detect the level of natural light in a room and adjust artificial lighting accordingly.

SSE07

Presence Sensors

Presence sensors go beyond simple motion detection by identifying if someone is present in a room for extended periods.

SSE08

Water Leak Sensors

Water leak sensors detect moisture or leaks in critical areas like basements, bathrooms, or under sinks. They send immediate alerts to your smartphone, allowing you to address the issue before it causes significant damage.

# Smart Touch Control Panels

Smart Control Panels

- The Smart Citizens Smart Touch Control Panel is the central hub of your smart home, offering intuitive and seamless control over all your connected devices. With its sleek, modern design and responsive touchscreen interface, this control panel allows you to effortlessly manage lighting, security, climate, and more from a single, convenient location.

- Designed for ease of use and customization, the Smart Touch Control Panel integrates with the entire Smart Citizens ecosystem, empowering you to create personalized scenes, monitor your home in real-time, and enhance your living experience with just a touch.

Smart Touch Control Panels: Centralized Control for Every Space

The Smart Citizens Smart Touch Control Panels are your gateway to effortless home automation, available in four versatile sizes—4", 6", 8", and 10.1". These panels offer a sleek, modern interface that seamlessly integrates with all your smart devices, allowing you to manage lighting, climate, security, and more from a single, easy-to-use hub. Whether you need compact control in smaller rooms or a comprehensive command center in your main living space, these touch panels provide the perfect solution, enhancing both functionality and style in your smart home.

Experience seamless control of lighting, climate, and security through an intuitive interface that brings ultimate convenience and efficiency to every space.

Smart Curtains

Smart Curtains

- Smart curtains offer automated control of your window coverings, providing convenience and energy efficiency. They can be operated remotely via smartphone apps or voice assistants like Alexa and Google Home.
- With scheduling and light sensor integration, smart curtains open and close automatically based on time or room conditions, enhancing privacy, temperature regulation, and comfort. Ideal for both residential and commercial spaces, they bring modern technology to everyday living while adding a touch of luxury.
- It includes a 220AC smart motor, track, and a wall-mounted curtain switch, with an optional remote control. Both the switch and remote are optional accessories.
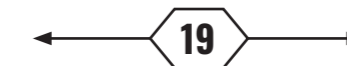

SCU01

Smart Curtains

Smart curtains provide a modern, automated solution for controlling window coverings with ease. Equipped with a 220AC smart motor, they can be operated through a wall-mounted switch, an optional remote control, or via a smartphone app. Users can easily open or close the curtains with a tap or voice commands using Alexa, Google Home, or other smart home systems.
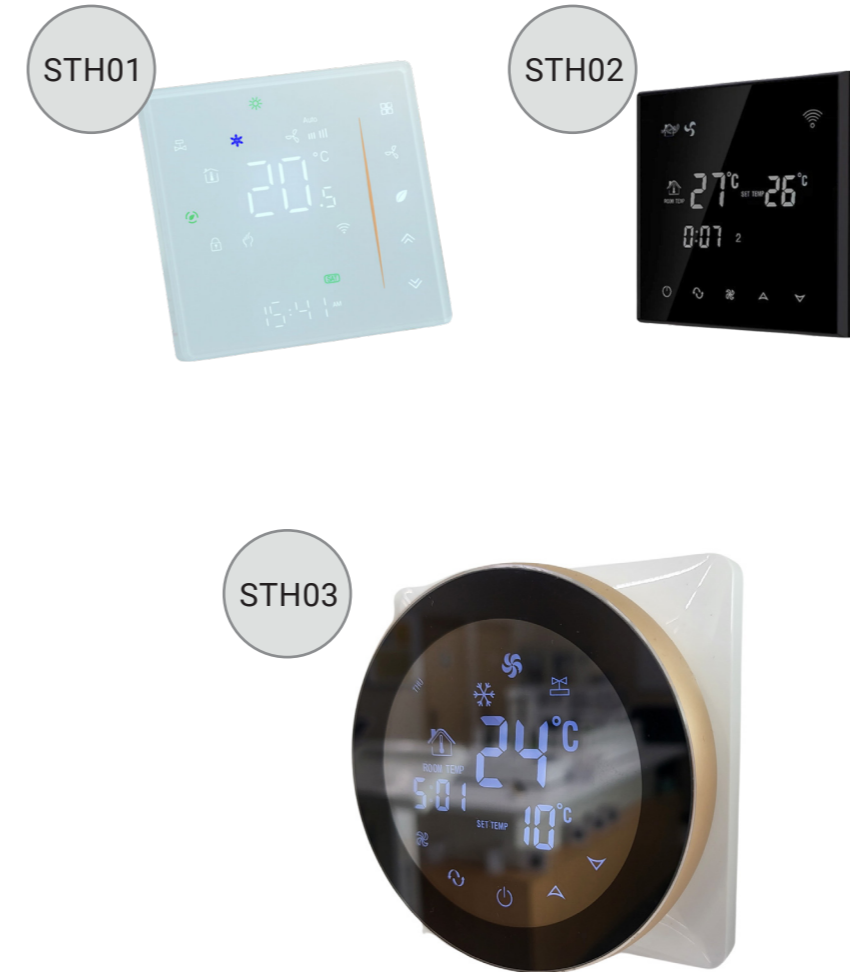

Multiple control options include:

- Manual Control: Operate the curtains using the wall-mounted switch or remote.
- Smartphone App: Connect via Wi-Fi or Zigbee to control, set schedules, or integrate with other smart devices from anywhere.
- Voice Control: Use voice commands with Alexa, Google Home, and other assistants to control the curtains hands-free.
- Scheduling: Program curtains to open or close at specific times, such as opening at sunrise and closing at sunset for natural lighting and energy efficiency.
- Weather Integration: Curtains can respond to weather conditions like high humidity or strong sunlight, automatically adjusting to protect interiors and optimize temperature.
- AC Integration: The system can close the curtains when the air conditioning is running to maintain a comfortable temperature and save energy.
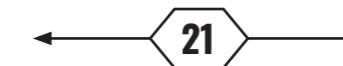

Smart Thermostats

- Remote control: Manage lighting, heating, and access via app or voice assistants.
- Energy savings: Schedule and optimize device usage to cut costs.
- Enhanced security: Remote access, automated lighting, and real-time alerts.
- Customization: Create personalized settings for activities.
- Seamless integration: Connect with other smart devices for unified control.

STH01

STH02

STH03

Smart AC Thermostat

- Energy Efficiency: By intelligently managing your HVAC system, the smart thermostat reduces energy consumption, helping you save on utility bills while maintaining optimal indoor temperatures.

- Programmable Settings: The thermostat offers customizable programming for weekdays and weekends, allowing you to set different temperature schedules based on your routine.For example, you can lower the temperature during work hours and raise it before you return home.

- Seamless Integration: Compatible with both 24V and 220V systems,

Smart Security System

- Smart security cameras are ideal for monitoring entrances, backyards, and other key areas. They can be mounted indoors or outdoors, offering flexible installation options.
- Perfect for home security, they monitor access points, detect intruders, and can be integrated with other smart devices, like door sensors or alarm systems, to create a fully automated security solution.
- Real-time alerts, remote access, and high-quality footage ensure peace of mind. The ability to watch live footage from anywhere allows users to monitor their property and respond quickly to potential threats, enhancing overall safety and security.

SSV01

Smart Peephole Video Doorbell 1080P

4.3-inch color display 720P HD resolution with a 120-degree field of view, night vision with infrared lights (4 lights), built-in 90dB, 3000mAh battery.

SSV02

Video Doorbell IP65 Waterproof

Battery Doorbell Video Doorbell IP65 Waterproof 1080P Works with Google Home & Alexa.

SSV03

Solar Alert Smart PTZ Camera

The WiFi Solar Alert Smart PTZ Camera features a 1.8W adjustable solar panel, 64G storage, PIR+AI detection, 2MP/4MP HD video, two-way intercom, and IP65 waterproof.

SSV04

Dome Indoor IP Camera

The dome Indoor IP Camera features 5MP resolution, color night vision, PoE, and Wi-Fi. It supports 128GB storage, and 250x360x410 mm design.

SSV05

Waterproof Outdoor Bullet Camera, HD video

The 5MP Waterproof Outdoor WiFi Bullet Camera offers HD video, dual LEDs, motion detection, siren alarm, two-way intercom, and supports Google Home, Amazon Alexa, and cloud/TF card storage.

SSV06

Panorama Camera

The 4MP HD Video Camera features 2560x1440 resolution, dual 1/3" CMOS sensors, 180° FOV, night vision, two-way video talk, motion/human/sound detection, siren alarm, and supports up to 128GB storage.

SSV07

Smart Camera NVR Kit 8CH

The Smart Wireless/Wired NVR Kit includes 8CH NVR with 8x 2MP (1080P) bullet cameras, H.265+ video, 3.6mm lens, 20M IR distance, outdoor waterproof design, and Wi-Fi smartphone access. Available with 16,32,and 64CH.

SSV08

Handheld Smart Screen

The Handheld Smart Screen Z1 features a compact 45x12x5 mm design, supporting Wi-Fi and infrared protocols for seamless connectivity and control.
